-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**DETAILED ACTION**

***Claim Rejections - 35 USC § 103***

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-66 are rejected under 35 U.S.C. 103(a) as being unpatentable over Miller (US 2004/0181877) in view of Waters (US 2792266).

Miller discloses the invention substantially as claimed. However, Miller is silent about a fastener with an attachment device being connected to it's support member. Waters teaches a fastener with an attachment device (7,8) being connected to a support member (3). It would have been considered obvious to one of ordinary skill in the art to modify Miller to include the attachment device as taught by Waters in order to provide a support for one's leg or arm or even as a means to pull oneself up from a lying position.

3. Claims 1-66 are rejected under 35 U.S.C. 103(a) as being unpatentable over Greenfield et al. '044 in view of Miller '877.

Greenfield et al. discloses the invention substantially as claimed. However, Greenfield et al. is silent about the pivoting/locking means of the support member as well as the telescoping feature of the support member. Miller teaches the pivoting/locking means of the support member as well as the telescoping feature of the support member. It would have been considered obvious to one of ordinary skill in the art to modify Greenfield et al. to include the pivoting/locking means of the support member as well as the

telescoping feature of the support member as taught by Miller in order to adjust the orientation of the stirrup.

**Conclusion**
